RAMping Up Genetic Gain report

The RAMping Up Genetic Gain report (RUGG) gives an overview of your stud's genetic performance.

The key areas that are reported are:

- Pedigree recording
- Trait recording
- Selection efficiency
- Data summaries
- Sire summaries
- Reproduction recording

The RUGGs are a great starting point for planning improvements to your breeding program.

The Sheep Genetics team, Peta, Emma and James, usually deliver the RUGGs at Regional Forums, shows and meetings. However, you can request a recent RUGG anytime by contacting them.
