

## AWSA Satellite Flock 2023 AI Report

The AI for the AWSA 2023 Satellite Flock was completed on the 11<sup>th</sup> and 12<sup>th</sup> of January 2023 at “Anden”, Willangie Victoria in their fantastic AI centre. Ken Watson and Courtney from Tatiara Breeding Services did the AI. The ewes are well grown maiden Merino ewes from “Hamilton Run” Jamestown SA in great condition. 350 ewes were given CIDR's to ensure we had 325 available for the program. In fact only 2 ewes were deemed unsuitable by Ken so we had plenty.

The ewes were prepared for AI by Joel and Trent Donnan and Joe (neighbor who assisted over the 2 days).

125 ewes (5 sires) were AI'd on the 11<sup>th</sup> January and 200 ewes on the 12<sup>th</sup> January 2023.

Help was given by David Pipkorn, Pete Angus, Andrew Frick, Andrew Donnan and Steve Milne, with Debbie Milne recording the new VID tag given to each ewe, the EID tag and joining sire. Denita Donnan provided the catering and accommodation for those that required it.

Overall the AI went very smoothly thanks to the Donnan family, an excellent AI centre and everyone who assisted over the 2 days.
